

# My First Report

Dataset: sample.csv (id=1)

## Overall Quality Score: 83.4 / 100

- Completeness: 97.9 — Share of non-missing values across all columns.
- Validity: 100.0 — Values conforming to their column's expected format and type.
- Consistency: 100.0 — Agreement of categorical values after normalizing case and whitespace.
- Accuracy: 91.1 — Share of numeric values within the expected (IQR-based) range.
- Freshness: 24.0 — Most recent value in 'signup\_date' is 925 day(s) old.
- Uniqueness: 87.5 — Absence of exact duplicate rows.

## Validation: 3/7 checks passed

## Anomalies: 3 flagged rows

## Top Recommendations

- [medium] Fill missing values in 'age' using the column median (12.5% missing).
- [medium] Review extreme values in 'age' — 1 IQR outlier(s) (14.3%).
- [medium] Review extreme values in 'amount' — 1 IQR outlier(s) (12.5%).
- [low] 'amount' is heavily skewed (Skew 2.83 (right-skewed)) — consider a log or Box-Cox transform before modeling.
